SUMMARY

Data and analytics engineer with 5+ years of experience using SQL, Python, dbt, Databricks, and ETL/ELT to analyze customer, campaign, CRM, ERP, and SaaS data. Experienced translating business requirements into data logic, validating customer-level outputs, building data quality checks, and partnering with Finance, Sales, Product, and business stakeholders to deliver accurate reporting and analytics.

SKILLS

Analytics: SQL, Python, Pandas, NumPy, PySpark, R, SAS, Excel, Data Analysis, Customer Segmentation, KPI Analysis, Data Validation, QA

Data Engineering: ETL/ELT, dbt, Databricks, Apache Spark, Airflow, Fivetran, Medallion/Lakehouse Architecture, Reverse ETL

Cloud & Data Platforms: Azure, AWS S3, Glue, Lambda, Redshift, Snowflake, Azure Synapse, Data Lake

BI & Visualization: Power BI, Tableau, Looker, Grafana, Hex

Data Quality: Schema Validation, Null Checks, Business-Logic Testing, Data Contracts, Schema Drift, PII Classification

Tools: Git, Jira, Docker, Terraform, Jupyter

PROFESSIONAL EXPERIENCE

Data Engineer – T-Mobile

New York, NY

August 2023 – Current

- Analyzed and transformed high-volume customer and campaign-related data across 15+ CRM, ERP, and SaaS sources, processing 2B+ daily advertising events including impressions, taps, and installs and 850M+ weekly App Store user records.
- Built and maintained SQL/dbt transformation logic across 60+ models in an Azure Databricks Medallion architecture, translating business requirements into reusable customer and reporting data models.
- Partnered with Finance, Sales, Product, and business stakeholders to define data requirements, KPI definitions, data contracts, and reporting rules, reducing ad hoc data requests by 40%.
- Developed customer-level risk analytics by combining billing, engagement, and usage signals in the Gold layer, enabling Customer Success teams to identify at-risk accounts representing \$230M+ in annual recurring revenue.
- Implemented automated schema, null, and business-logic validation across 100% of critical financial models, eliminating a recurring class of data-quality and broken-dashboard incidents.
- Owned the BI serving layer and validated KPI outputs across 8 executive dashboards, resolving ambiguous business definitions and maintaining consistent metrics across stakeholder teams.
- Analyzed large-scale customer and advertising datasets using SQL and Python to identify behavioral patterns and support segmentation, reporting, and business decision-making.
- Created and validated business rules for customer risk and engagement analytics by combining billing, usage, and behavioral signals into standardized Gold-layer datasets.

Graduate Research Assistant – New York Institute of Technology

New York, NY

September 2021 – May 2023

- Audited and analyzed large-scale internal datasets using SQL and Excel to improve data accuracy, identify actionable trends, and support student-employer engagement initiatives that contributed to a 25% increase in placements.
- Built Tableau and Power BI dashboards and streamlined data extraction and reporting workflows to provide leadership with validated KPIs for planning and resource allocation.

Web Development Intern – Nuclear Power Corporation of India Limited

Mumbai, India

June 2018 – July 2018

- Developed responsive React and Bootstrap components and collaborated with the internal development team to improve the organization's careers portal and user experience.

PROJECTS

APEX Accounting Agent Workbench

Python, Groq, Tool Calling

- Developed a human-in-the-loop AI workbench enabling workspace file selection, autonomous task execution, real-time activity tracking, and supervisor pause, interrupt, and guidance controls.

SaaS Churn Analytics Platform

dbt, Databricks, Python

- Engineered a customer churn analytics pipeline using Medallion architecture, dbt transformations, composite risk scoring, and automated data-quality testing to identify high-risk revenue.

EDUCATION

New England College – Executive M.S. in Artificial Intelligence

August 2026 – May 2028

New York Institute of Technology – M.S. in Computer Science, GPA: 3.80/4.0

September 2021 – May 2023

Mumbai University – B.S. in Computer Science, GPA: 3.4/4.0

August 2017 – June 2021
